Took a highschool diploma in Biotechnologi and chemistry, where i ended with a grade of 10.7. Highschool exam project was using c sharp (unity) to make a game. Currently doing a bsc in engineerig (software) at Aalborg university. University focuses on teamwork, so i have lots of experience with larger groups. Lots of skills in programming. Large interest in electronics. Done multiple projects. Capable of using machine learning using python. Also read a lot of statistics and probability theory to learn the theory behind it. Can use neural networks, to predict behavior. Done with my bsc in 2025, where i will be a master in artificial intelligence. Degree in computerscientious
